

# INSTRUCTIONS FOR

## EZ Grid™ Thermal Transfer Label Application

**Step 1.** Tear five blisters from the 25.

**Step 2.** Place the blisters in the white blister insert.

**Step 3.** Remove five labels from the roll and align to the blisters.

**Step 4.** Use the roller with firm pressure to adhere the labels to the blisters.

**Note:**

For best results, let the adhesive set for 24 hours prior to opening.  
To separate blisters, crease a row at a time by bending it back and forth, then tear it from the sheet. Repeat with individual blisters.
